1. Equation

1. Equation

```
import math

def solution(brown, yellow):
    for y in range(1, int(math.sqrt(yellow)) + 1):
        if yellow % y == 0 and 2 * (yellow // y + 2 + y) == brown:
            return [yellow // y + 2, y + 2]
```
