```
class Solution {
    public int[] solution(String s) {
        int[] cnt = {0, 0};
        String prev = s;
        while (!s.equals("1")) {
            s = s.replace("0", "");
            cnt[1] += prev.length() - s.length();
            s = Integer.toString(s.length());
            cnt[0] += 1;
            prev = s;
        }
        return cnt;
    }
}
```
