```
def solution(nums):
    pokemon = dict()
    for n in nums:
        pokemon[n] = pokemon.get(n, 0) + 1

    if len(pokemon) <= len(nums) / 2:
        return len(pokemon)
    else:
        return len(nums) / 2
```
