1. Min/Max

1. Min/Max

```
class Solution {
    public String solution(String s) {
        String[] nums = s.split(" ");
        int min = Integer.parseInt(nums[0]);
        int max = Integer.parseInt(nums[0]);
        for (int i = 1; i < nums.length; i++) {
            int num = Integer.parseInt(nums[i]);

            if (min > num) {
                min = num;
            } else if (max < num) {
                max = num;
            }
        }

        return Integer.toString(min) + " " + Integer.toString(max);
    }
}
```
