---

1. Python List

```
def solution(arr):
    answer = []

    prev = -1
    for a in arr:
        if prev != a:
            answer.append(a)
        prev = a
    return answer
```

2. List Slicing

```
def solution(arr):
    answer = []

    for a in arr:
        if answer[-1:] == [a]:
```

```
            continue
        answer.append(a)

    return answer
```
